MG 492 - Saskatoon Postcard Collection

Dates: – [ca. 1940s].

Extent: – 62 b&w postcards.

Scope and content: These postcards are printed photographs (not real photo) images of the University of Saskatchewan campus, and Saskatoon, taken during the 1940s. The postcards have not been used: each is identified with a “negative number” on the back, although the photographer is not known. It is assumed these were a reference set, from which orders for more postcards could be made. They are in pristine condition and provide exceptionally clear images of early University buildings, such as the original Veterinary Medicine building and the student-built “New Medical College,” as well as rare images of Saskatoon, including the Bessborough Hotel gardens and views of bridges from the road.

They were found in British Columbia as part of an estate. Titles from the cards have been retained.

Restrictions: There are no restrictions on access.

1. 25th Street Bridge
2. 25th Street Bridge
