Dear Sir:

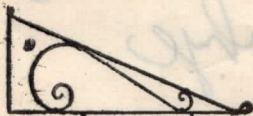

Replying to your letter of the 27th re Exide Radio 'A' Battery. We have the three types as per enclosed 'Users' net Price f. o. b. Saskatoon' which are the 3-LX-5, 9, 13, & 17. The 3-LX-9 which is \$29.45 is used in most cases. The 3-LX-5 would do but you get better results from the 3-LX-9.

Yours very truly,

Lemery-Denison Electric, Limited.

Dear Sir

I am sorry for my ~~not satisfied~~ ^{dissatisfaction} with the

shipment of Super (Red) Wheat -

I would point out that appearance are very different in respect to seed grain.

This wheat & all its representative -

It is 1st grade also seed and its texture & texture of grain it is smooth & grocer

and there is more abundance in high quality in respect to 1st grade & proceeds as what I sent you.

It cannot be compared to commercial grade - with ordinary seed wheat.

It is not in any way similar to that which is sold to -

It is almost free of any trace of chaff or husk

and I would ~~right~~ point out that after

the quality of any seed cannot be determined on appearance alone but only on its performance

in the field when sown
