

January 24th, 1927,

Dr. Seager Wheeler,
Rosthern,
Sask.,

Dear Dr. Wheeler:

I have been following the performance of your Early Triumph wheat at our different Branch Farms, as well as at Provincial Institutions in the West, during the past four or five years particularly, and find that it has given a good account of itself. I am inclined to think that this variety is one which is entitled to registration, and am wondering whether or not you contemplate asking to have it registered. If I remember correctly, application for registration of this variety was made by you some years ago, but for lack of proper data it was not accepted. If you desire to apply to have the variety registered, we will be glad to compile for you a statement indicating the yields obtained from this variety compared with other standard sorts, such as Marquis, so that you may submit this statement to your Provincial Seed Board for action. Professor Champlin is the Chairman of this Board and all you need do is to make formal application through him to have the variety registered, accompanying such application with a statement showing how the variety has performed at different Stations during the past few years. Such a statement would then be submitted by Professor Champlin at the first meeting of the Board, and if the said Board agrees that the variety should be recognized, he reports accordingly to the Secretary of the Seed Growers' Association at Ottawa. The Secretary then sends this application on to the Appeal Board for final approval or rejecting.

L H Deanna
Box 26
Ottawa

Dear Mr Deanna
I am in receipt of your of the 24th

and am pleased to know that the Hardy High
wheat is changing so well
I would be pleased to receive from you a statement
indicating the yield obtained in comparison with
other varieties as far suggested in order that I
may take steps to make application to have the
Hardy High registered.

I appreciate very much your interest & cooperation
